

PRODUCT SHEET // FLASHBAG

**SKYWALK**

## STRUCTURE

The FLASHBAG is designed to enable tandem pilots to pack their wing quickly after landing. Its robust construction and durable aluminium buckles ensure long-lasting performance, tailored specifically to the demands of professional tandem use. With a weight of just 580g it is quite lightweight.

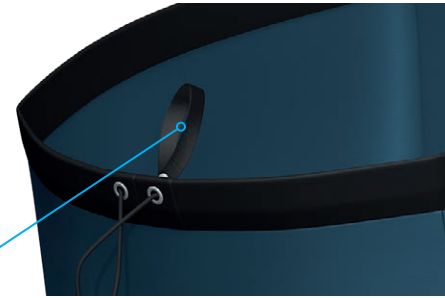

In combination with the GUIDE and GUEST, the FLASHBAG can also serve as a packsack for the entire tandem equipment when the protectors are deflated beforehand.

## DETAILS

### Riser fixation

Loop to secure the risers.

### Storage compartment

Small zippered compartment for safely storing valuables or other small items

### Drawstring

The drawstring allows for a wide opening for easy packing and quick closure.
