

PRODUCT SHEET // FLASHBAG

SKYWALK

STRUCTURE

The FLASHBAG is designed to enable tandem pilots to pack their wing quickly after landing. Its robust construction and durable aluminium buckles ensure long-lasting performance, tailored specifically to the demands of professional tandem use. With a weight of just 580g it is quite lightweight.

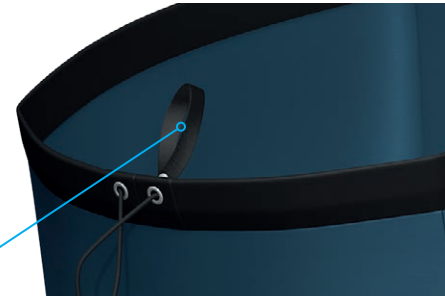

In combination with the GUIDE and GUEST, the FLASHBAG can also serve as a packsack for the entire tandem equipment when the protectors are deflated beforehand.

DETAILS

Riser fixation

Loop to secure the risers.

Storage compartment

Small zippered compartment for safely storing valuables or other small items
